WORK EXPERIENCE

Equity Bank Kenya Limited — *iOS Engineer*

MAR 2022 - PRESENT

Played a pivotal role in developing Equity Mobile, expanding digital banking access across East and Central Africa. Collaborated with a team to conduct iOS app regressions, significantly reducing post-release issues, and successfully managed end-to-end release processes to ensure timely updates on the App Store.

Collaborated with cross-functional teams globally to develop a successful product using MVVM-C architecture, Fastlane, Azure for version control and project management, RxSwift, Alamofire, and Moya. The app achieved a #4 ranking in the Finance Charts in Kenya, with approximately 12,000 reviews and a rating of 4.8/5.0.

Mentored 15 junior iOS developers through the Equity Leadership Programme, providing comprehensive training and creating a structured learning path to advance them from entry-level to mid-level and ultimately to senior roles.

Qhala Limited — *Software Engineer*

AUG 2020 - FEB 2022

Led the development of a gamified audio-visual web app and an iOS app using HTML, CSS, jQuery, and Swift to educate African children about their rights, identify violations, and understand reporting processes. Successfully impacted numerous children across Africa.

Contributed to the development of Jukua, a B2B e-commerce web app built in JavaScript, focusing on implementing escrow, negotiation, and order fulfillment features. Registered up to 100 SMEs and businesses within the first two months of its launch.

Martian Enterprise — *Developer*

FEB 2017 - FEB 2020 — *Web Designer & Junior iOS Developer*

Implementation of sections of the Taxpayr app - a digital tax advisor encompassing all payments for customs, income tax, VAT and a wedding management app for iOS, running off of GraphQL.

Topical Memory System — ***a memory verse app to keep you engrossed in God's word***

A fun and easy way to memorize Bible verses. With our engaging games and quizzes, you'll be learning verses in no time!

https://apps.apple.com/app/topical-memory-system/id6463799590

Guri Homes — *a virtual real estate platform for Africans by Africans*

Development of a web platform built in NextJS, TypeScript and Firebase Guri caters to the distinct requirements of Kenyan and African diaspora, providing comprehensive remote home management and construction solutions. My responsibilities spanned the project development lifecycle, from development to deployment.

https://platform.guritech.co

HAKI — *a childrens' rights platform for African Children*

A web platform actively in use for training children across Africa on their rights. We aim to have it used as part of the curriculum in schools.
